

INSTALLATION INSTRUCTIONS

LKSLT
LOCKING BRACKET

CARTON CONTENTS

QUANTITY	DESCRIPTION
10	LOCKING BRACKET

TOOLS REQUIRED - PHILLIPS SCREW DRIVER AND / OR PLIERS

The Locking bracket would be typically used where you don't want the mounted object to be easily (accidentally) pulled away from its mounting on the slatwall. Yet it is easily moved / relocated by sliding the bracket apart and together in another location. ie. no permanent mounting screws are needed.

ASSEMBLY:

Step #1

Step #2 - Slide tongues / grooves together or apart

Consideration # 1: The LKSLT, Locking Bracket can be installed anywhere on the back surface of an object.

Consideration # 2: Any type fastener can be used - wood screw, nut/ bolt, toggle bolt, drywall screw, pop rivet, etc. Fasteners are not supplied with the brackets.
